

Patient Name	Hamzah Hamad Hamad	Patient Type	OP
Patient MRN	2275670	Exam Date	15/04/2024 2:37PM
Gender/Age	M/17 y	Finalized Date	15/04/2024 2:45PM
Ref. Phys.	External Doctor		

REPORT

EXAM: URINARY TRACT ULTRASOUND

Findings:

Mild right sided pelvicalyceal fullness is noted, otherwise, both kidneys appear normal in size , shape , position and echogenicity with no evidence of stones or frank hydronephrosis .

The right kidney measures about 10.4 cm in length and 1.3 cm in cortical thickness.
The left kidney measures about 12.7 cm in length and 1.5 cm in cortical thickness.

Normal shape , outline and capacity of the urinary bladder without evidence of focal lesion .

The prostate appears normal in size and texture measuring about 15 mL.

The postvoiding residual urine measures about 25 mL out of 240 mL.
